Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-21, drawn to a multi-chamber apparatus that includes a filter.

Group II, claim(s) 22-24, drawn to an instrument for analyzing an analyte comprising a microprocessor, a light emitting source, a light detector, a display, a driver, a converter and means to connect to a power source.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The invention of groups I and II lack the same corresponding technical features. Group I does not require any of the technical features of a microprocessor, a light emitting source, a light detector, a display, a driver, a converter or means to connect to a power source that are present in group II. Group II does not require any of the technical features present in group I such as a multi-chamber apparatus that includes a filter.

A telephone call was made to Ms. Carol Burton on 10/8/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
